Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The applicant seeks clarification of the rejection, specifically concerning the intercepting step of claim 1. The examiner maintains that Blumenau teaches the intercepting as cited as the content request is received so that handoff instructions may be generated before the request is fulfilled. The examiner also suggests that the 112 rejection concerning detecting a change in root level domains can be overcome if the applicant files remarks pointing to the sections of the specification that support the limitation and further remark on how the detecting of a change in root level domains would be incorporated into the process set forth in various parts of the specification.
